

Novitatech Test Laboratory List of Standards Compliant Equipment

26th July 2018

All enquiries about Standards (ISO, AS/NZS, BS, IEC), testing, and accreditation should be directed to:

Title: Manager, Test Laboratory, Novitatech,
Post: P.O. Box 2438, Regency Park, S.A. Australia, 5942
Location: Novitatech, 171 Days Road, Regency Park, SA, Australia, 5010
Phone: (08) 8243 8261
Email : testing@novita.org.au
Web: <http://www.novitatech.org.au>

This Document lists a range of products that have passed Standards testing in the Novitatech Test Laboratory (formerly “Rehabilitation Engineering Equipment Testing Laboratory”). This document is intended as a summarising document only – the detailed test report is the official NATA endorsed document and should be considered to take precedence.

Only equipment that has been mechanically tested to a complete Standard, and can hence claim *FULL COMPLIANCE* (**except tests that our laboratory cannot perform: corrosion, rain effect, climatic storage, materials and finishes and selected battery charger compliance tests**), are automatically listed after successful completion of testing providing that customers have agreed to include their products on the list.

However, as per NATA requirements, we need a written request to include your product into the list if:

- Your products were successfully tested only to parts or specific test methods of a Standard (partial testing);
- Your products passed successfully only some parts or specific tests of a Standard (partial compliance).

Please note:

The results achieved when products are tested in their standard factory settings may not apply at the extremes of adjustment. The relevant Standard for each product is listed and *colour codes used:*

Compliance State	Colour	Description / Meaning
Full compliance for Manual wheelchairs only that comply to the new standard AS/NZS 3695.1:2011	Pink	For Manual wheelchairs only, complying to the latest standard AS/NZS 3695.1:2011 The product was tested and demonstrated compliance with all requirements of the specified standard within the scope of the laboratory's accreditation.
Electric Wheelchairs only that comply with the old standard AS 3695:1992	Aqua	For Electric wheelchairs only complying to the old standard AS 3695:1992 The product was tested and demonstrated compliance with all requirements of the specified standard within the scope of the laboratory's accreditation.
Full compliance	White	The product was tested and demonstrated compliance with all requirements of the specified standard within the scope of the laboratory's accreditation.
Full compliance except tested to superseded test methods for static stability, dynamic stability and brakes efficiency. (see Appendix A)	Purple	The product was tested and demonstrated compliance with all requirements of the specified standard within the scope of the laboratory's accreditation prior to October 2008 at which time new static stability tests, dynamic stability tests and brakes tests were introduced for wheelchairs. Thus compliance with the new requirements has not yet been verified. All products tested prior to October 2008 will be marked as such for a grace period, after which point their compliance will be listed as compliant with an obsolete standard. See Appendix A for explanation of new requirements.
Full testing with partial compliance	Blue	The product was tested for a complete standard but demonstrated compliance with selected clauses or parts of the standard only
Partial testing or partial compliance	Light Green	For wheelchairs, the product was tested prior to November 2008 and therefore compliance is limited as for purple above and the product was tested and demonstrated compliance with selected clauses or parts of the standard
Obsolete Standard	Tan	The product was tested and demonstrated compliance with all requirements of the obsolete specified standard within the scope of the laboratory's accreditation.
Non-standard testing (Non-Standard)	Yellow	The product was tested and demonstrated compliance with all requirements of the in-house developed non-standard methods and criterions.
